Durasi	28:41
Pembicara	3 orang

Ringkasan Eksekutif

Rekap ini disusun dari transkrip meeting berdurasi 28:41 dengan 3 pembicara. Ringkasan: 13 poin. Keputusan: tidak ditemukan. Action items: 3 item. Isu terbuka: belum dianalisis.

Perlu konfirmasi: tenggat tidak disebut pada A1, A2.

Ringkasan

1. Tim menyelesaikan dua tugas utama dan menunggu review untuk yang lainnya.

> *"so we finished these two which is great. So, this one was closed. This one was was not um,"*
> Speaker 0, 01:26

2. Penyelesaian tugas dianggap sukses meski kriteria keberhasilan tidak jelas.

> *"I think it was by and large I I don't know what success criteria we're we're measuring but I think it was an improvement"*
> Speaker 0, 04:01

3. Tugas-tugas yang sudah selesai dianggap berhasil karena banyaknya pekerjaan di GitLab.

> *"people pick these up. They they pretty much finished them"*
> Speaker 0, 04:16

4. Diskusi tentang engineer yang didedikasikan akan dilanjutkan setelah summit.

> *"So, maybe Sean I could talk to you about it here really quickly which is the dedicated engineer thing"*
> Speaker 0, 04:45

5. Pembahasan tentang penjadwalan review dan prioritas due 22nd

> *"That fine yeah like I don't think this is super uber urgent like that the history is there so I I I'll just manually put those up once you do it."*
> Speaker 0, 10:23

6. Pengaturan ulang agenda untuk membahas proses review

> *"so I I moved around the order in the agenda item because we already just talked about number four review process as oh no we didn't talk about this."*
> Speaker 0, 10:35

7. Tanggung jawab review merge request berada pada penulis MR.

> *"in general you know people own their own merge request and making sure it gets reviewed"*
> Speaker 1, 12:45

8. Tujuan sistem due 22nd adalah mengurangi ketidakpastian dan tekanan waktu

> *"the purpose of this as far as I 'm concerned is to reduce um, the uncertainty and the amount of time pressure people feel on things like that and the amount of bunching that happens with review requests rather than to have a second place where we bunch everything up and everyone's like uh I need to get this merged by the 22nd because it's got due 22nd on it like you know the the point is to manage our work throughout the month."*
> Speaker 1, 15:08

9. Perlu ada ekspektasi dan komunikasi yang jelas tentang tujuan due 22nd

> *"No I totally agree with you on the on the purpose of the due 22nd but operationally we should have a clear expectation and a communication on what is the goal."*
> Speaker 0, 15:29

10. Prioritas pekerjaan di dalam tim adalah menyelesaikan tugas sebelum due 22nd

> *"you try to get things done on before due 22nd and um, if you have a choice to work on one thing versus another thing you work on the due 22nd one first."*
> Speaker 0, 16:23

11. Reviewer harus memprioritaskan tugas due 22nd meskipun ada pekerjaan lain

> *"when it comes to reviewer I think that gets really complicated because then I think you're saying they they should work on something that's something else and not to due 22nd first a thing first."*
> Speaker 0, 17:00

12. Goal akhir adalah merge issue pada due 22nd untuk menghindari keterlambatan review

> *"if we said it's in review roll out but we don't control how much work will come back from the review which is why I think the goal should be to have it merged by the 22nd."*
> Speaker 1, 18:42

13. Keputusan untuk menunda diskusi sampai Andre kembali

> *"Um, yeah I mean maybe we just talk about this again when Andre's back."*
> Speaker 1, 20:26

Keputusan

Tidak ditemukan dalam transkrip.

Action Items

A1. Andre akan berbicara dengan Tim untuk menindaklanjuti masalah dedicated engineer.

Penanggung jawab	Andre
Tenggat	tidak disebut

> *"he'll talk with Tim further"*
> Speaker 0, 04:45

A2. Sean akan meninjau tech debt masa depan.

Penanggung jawab	Sean
Tenggat	tidak disebut

> *"Sean look at future tech debt"*
> Speaker 0, 27:20

A3. Speaker 1 akan menambahkan agenda menarik pada pertemuan minggu depan.

Penanggung jawab Speaker 1
Tenggat next week (relatif, tanpa tanggal)

> *"I can put more exciting things on the agenda next week"*
> Speaker 1, 28:21

Isu Terbuka

Belum dianalisis untuk rekap ini.

Statistik Pembicara

Pembicara	Waktu bicara	Proporsi	Giliran	Kata
Speaker 0	15:48	65,3%	68	3132
Speaker 1	08:10	33,7%	64	1711
Speaker 2	00:15	1,0%	6	47

Transkrip

00:01 Speaker 0
posted. So, I'm recording now. Um, so, first one I I wanted to bring up. So, this should be a short meeting actually. Uh, so I'll share my screen and if I share it I should not show confidential stuff. Um, but yeah maybe I won't share it but like um, so sorry I should have linked to this. So, do 20

00:22 Speaker 1
There aren't any confidential due 22nd issues if that helps.

00:25 Speaker 0
Okay, that that's helpful. Thank you. Um, it it does help. Thanks Sean. So, um I'm just going to find the confidential the due 22nd issues and for uh what is this milestone 11. Um, 11.2 right?

00:48 Speaker 1
Yeah.

00:48 Speaker 0
So, if uh oh no sorry. 11.2 how come I'm not getting any due 20

01:01 Speaker 1
11.3

01:02 Speaker 2
Are we on 11.3?

01:07 Speaker 0
We're like two years into this like or not really one one one year into this like staggered thing and then I'm still oh you are you already put it. Thank you Sean. Um, so my screen. Um, so we finished these two which is great. So, this one was closed. This one was was not um, and then okay yeah so that that that one's done. So, this is great. Uh, any comments on these two Sean or or just you expected them to be done or

01:45 Speaker 1
Uh, no just yeah what you said.

01:49 **Speaker 0**
Okay, great. And then uh what was it going to show? Uh, the open ones. So, some of these are done but waiting for review. So, I'm pretty happy about that and we can talk about it like um,

02:01 **Speaker 1**
Yeah, I'm not super concerned about that. So, what I've been saying to people is like you know obviously it's not there's no consequence for missing this and because of the summit like you know most of these are in review but don't have um,

02:17 **Speaker 0**
Right.

02:18 **Speaker 1**
haven't had final review yet. So, um one I would want to call out is that uh first one uh which Jaco was looking at but is not in a review because we don't know what the issue is yet.

02:30 **Speaker 0**
Exactly yep.

02:32 **Speaker 1**
Um, so that one is like a complete mess. Um, the next one the usage ping is basically done it's just waiting to emerge. The one after that yeah just turned out to be more complicated than we thought. Um, so that has uh had an impact on Jan. Um, the fortunate part there is that Jan's not going to the summit. So, like it's not um,

02:55 **Speaker 0**
Right.

02:56 **Speaker 1**
yeah it'll it'll still make it into 11.3 I would say but it might have an impact on Jan's other issues.

03:01 **Speaker 0**
Mhm.

03:02 **Speaker 1**
Um, the sorting one apparently needed some back end work so I'm not quite sure what's oh no sorry that's the that 's the other sorting one. Um,

03:10 **Speaker 0**
this one right yep.

03:11 **Speaker 1**
Yeah yeah sorry that one's in review. Um,

03:16 **Speaker 0**
Is this one started?

03:18 **Speaker 1**
Yeah, it's in review.

03:19 **Speaker 0**
Oh yeah yeah right right I I met with them yesterday yeah they said that it's it's also in review. Um, so yeah I I had a comment we can talk about next on that uh in review but it seems like everything I think this one was not started right?

03:33 **Speaker 1**
Uh, as far as I'm aware like I think Constance just started that but I don't know. Um, the the other Jira one um, Felipe had a look and commented on the issue and he doesn't think it's actually a bug. Um, like so he tried to make it clearer to people but we're just waiting for a response from people so

03:37 **Speaker 0**
Yeah. Right. Yeah. Right.

03:51 Speaker 1
um, we'll probably you know that unless it if they say that makes sense then that's solved and we don't need to actually write any code.

04:01 Speaker 0
Right exactly. So, yeah no I wanted to do is go over these really quickly and comment that I think it was by and large I I don't know what success criteria we're we're measuring but I think it was an improvement and that at least people picked these up. So, I I mean that seems very trivial like oh like please work on these things but you know with like the amount of stuff that we work at GitLab I think this was a success from that perspective. Um, people pick these up. They they pretty much finished them and then I have different topics to talk about like they're not actually finished finished but at least they're not like so like this one is is a problem for for for a different reason um, regarding that that I already talked to Andre about. So, maybe Sean I could talk to you about it here really quickly which is the dedicated engineer thing. And so on the front end team dedicated doesn't really super mean dedicated right now and and I don't agree with that so I I brought that up with Andre and then he he says he he sympathizes pretty much agrees um, and as he said the follow up is that he'll talk with Tim further and then we'll revisit like the discussion when everybody returns from the summit.

05:09 Speaker 0
Um, but to me the the problem that this surfaced for me is that Constance had been assigned this one specifically but then he didn't get to it until like maybe late last week if if at all. Um, because he was presumably working on other other things. So, to me that defeats the purpose of dedicated. So, I wanted to get your thoughts do you agree with that? And is that also what on your team right now is is it pretty much dedicated or is it there's some like give there?

05:39 Speaker 1
Uh, on my team because it's planned now everybody's dedicated.

05:44 Speaker 0
Okay.

05:44 Speaker 1
Because um,

05:44 Speaker 0
So, it's it's a non-issue right yeah.

05:46 Speaker 1
Rosalind although Mark moved to create

05:48 Speaker 0
Right right.

05:49 Speaker 1
So, they're the dedicated people for create but like on a different team now so

05:51 Speaker 0
Right. Okay. Yeah no I I just wanted to I mean I'll I'll repeat what I told um, Andre to to you Sean which I I think is is relevant but when when I at least when I go through this I'm I'm not obsessed with things not being done on due 22nd. Um, I'm obsessed with um, like people not starting on them and then that they were uh that they were working on other things and then so it to me that defeats the purpose of planning. So, because if we we plan these things I I know at least you Sean and Andre do a do a really you know difficult job or or or are trying to plan specifically that you have this much time and then that you will work on these things.

06:38 Speaker 0
If you're already accounting for in in I guess in this case is what Andre accounted for that they're actually working on other things then that sucks for me because then I don't know about that and then that sets a false expectation for me. Right? So, but if the expectation is that you know an engineer they're dedicated to plan they have these two weeks up to due 22nd that they're just going to work on it then that's a really then it's clear to me um, then I can uh if they're on vacation that's also clear to me because I can see in Google calendar and so on and so forth. So, um that

that's what I wanted to to communicate and then Andre agrees. So, let me so so does that all make sense Sean do you disagree with any of that statement?

07:17 Speaker 1
Uh, no. Um, so the two things I would say about the G 22nd things for my team are um, Jan's one which I mentioned which just turned out to be more um,

07:29 Speaker 0
Right.

07:30 Speaker 1
work. So, that's useful information. Um, but like you know not particularly

07:36 Speaker 0
Right.

07:36 Speaker 1
an issue with this system. Um,

07:39 Speaker 0
That's just like a regular retro thing like how do we do better estimating things and so forth.

07:45 Speaker 1
Yes. Um, the other one was um, Jaco's one that she hasn't really made any progress on. I think she had three G 22nd which I think is probably too many. Um,

07:59 Speaker 0
Right.

08:00 Speaker 1
But we can you know we can discuss that next time we do it but I think that was part of the reason so she was making sure that she got the other ones done because I think they were higher on the board but because she had three like other people only had one or two um, it makes it hard to make sure that they're all in in time. Right. But apart from that yeah I'm pretty happy with it so far. Um,

08:21 Speaker 0
And then I will um, sorry I was cutting you off Jaco go ahead Sean.

08:26 Speaker 1
So, the other thing is the batch commenting uh from what I understand Andre hasn't had a huge amount of time to work on that. So, that might well miss 11.3 as well.

08:39 Speaker 0
Right.

08:39 Speaker 1
Um,

08:41 Speaker 0
Well I mean I I mean that's I didn't put a due 22nd on it it's well well but that was also like impossible I would presume to be done in due 22nd. So, this system doesn't really capture that well because it it it's saying what's due and not to do things in a certain order. So, um but yeah I I I don't see any action on that issue either. So, I I I you know anticipate that we will hear from something when they get back. Um, and even Mario I didn't see anything he added.

09:14 Speaker 1
Uh, no I was speaking to Mario about it so basically he's pushed the changes that he's made but he's he was mostly focused on the Jira thing because that was due 22nd and also

09:23 Speaker 0
Exactly exactly. Yeah so I

09:25 Speaker 1
blocking Andre Andre's like you know just blocked by other things.

09:28 Speaker 0
Okay. That yeah that to me that's fair because we didn't prioritize that. Um, so I was trying to type here is um, so I'm thinking we could just document this for now maybe on the retro uh issue is that a good idea?

09:49 Speaker 1
Yeah.

09:49 Speaker 0
Just put it out and we'll figure something out in the future if we like I I don't want to create another spreadsheet for the sake of creating spreadsheets because they're really annoying.

09:56 Speaker 1
Yeah.

09:58 Speaker 0
Okay. So, I'll probably do that at some point or or wait till you I I think you've already created it right? I

10:07 Speaker 1
Uh, no I 've not created the Jira issue for 11 dot

10:11 Speaker 0
three

10:12 Speaker 1
three but I no uh so the reason I don't create them until after the freeze is because we don't know which things didn't make it after the freeze but yeah

10:21 Speaker 0
Okay. That fine yeah like I don't think this is super uber urgent like that the history is there so I I I'll just manually put those up once you do it. Um, so I I moved around the order in the agenda item because we already just talked about number four review process as oh no we didn't talk about this. So, I wanted to talk about this. Um, again I don't I think this discussion is way beyond plan. Um, but I wanted to bring it up with you Sean at least um, since you're here. Um, so the the example here I said is that one of the issues at least one of the issues was already assigned to somebody to review I think James. Um, but presumably he's in summit mode or doing other things or doesn't even know about the due 22nd thing.

11:13 Speaker 0
So, what are your thoughts on that like is that something that we don't address now? Is that something we can iterate on a change? Cuz I I personally do can't think of any thing to solve this problem right now because we by by definition we throw MRs to non-plan engineers to review. And that to me seems really crazy from a management perspective but I totally appreciate it from like a GitLab wants to share code knowledge with everybody perspective and that that's always been the process as my understanding.

11:50 Speaker 1
Um, yeah I don't I don't particularly see it as a problem unless it's going to lead to somebody missing a deadline but I think that's a sort of cross team problem rather than an individual team's problem. Um, so yeah from my perspective I don't have a huge amount of concerns about that.

12:09 Speaker 0
Okay. So, so in this particular case we tried to finish the due 22nd and it that the the MR was already ready for review like Friday. And then um, and and and it was assigned to James and so do you expect the developers to ping them more or do you say like oh this was just summit month so don't worry about it because James probably would have seen it by today. And then like giving them giving him three days to review it is more than enough type of thing.

12:41 Speaker 1
Yeah I mean in general you know people own their own merge request and making sure it gets reviewed.

12:51 **Speaker 0**
Okay.

12:51 **Speaker 1**
We've talked a few times about in the main retrospective and in our retrospective actually about you know making sure that we um,

12:59 **Speaker 0**
follow up

13:01 **Speaker 1**
yeah we we make sure that that happens but it's it's the person who's writing the MR's responsibility to make sure that happens. So, yeah.

13:10 **Speaker 0**
Okay. So, so maybe if like yeah to me this is a confluence of things especially the due 22nd but my sense is the team members are they won't bug the reviewer that much. Is that is that the case? And then maybe they'll give them like even a whole week if they're they're not. Or is that not supposed to be the case?

13:34 **Speaker 1**
Uh, yeah I mean it's it's it didn't have much it matters like if it's if it's not affecting a deadline like you know the the whole point of people having different things to work on is the

13:44 **Speaker 0**
Well no this this one affected the deadline right that that's my point. This is or or maybe you're saying like this due 22nd is not a

13:50 **Speaker 1**
Right it's not like you know if it if it misses due 22nd nothing happens right? Like if if you've got an MR in review for due 22nd you can still work on other stuff.

13:57 **Speaker 0**
Right. Okay. Yes but um, are are you saying because this this is summit month be are you saying because this is an uh uh the first time this is we're still in experimental mode are you saying um, that this is your understanding of due 22nd?

14:15 **Speaker 1**
Um, okay so

14:19 **Speaker 0**
like like maybe we we were we had misaligned expectations of due 22nd. So, maybe we need to correct that first I think is is the problem.

14:26 **Speaker 1**
So so my expectation is that next month more things will be merged on the 22nd that are due 22nd but in general

14:32 **Speaker 0**
Okay.

14:34 **Speaker 1**
like I see the point of the due 22nd label to give us better information about what's going to ship in the second half of the month

14:40 **Speaker 0**
Mhm.

14:41 **Speaker 1**
not to like worry about whether someone's reviewed this in the last couple of days or not because that's you know

14:48 **Speaker 0**
Well do you

14:49 **Speaker 1**
I don't

14:51 **Speaker 0**
Go ahead.

14:53 **Speaker 1**
I don't want to use it like because I think people already feel too much time pressure around the existing freeze we have. I don't want to create a second one where we have more time where you know where we add that time pressure. I want to reduce the time pressure from the freeze by doing this. Like you know the purpose of this as far as I 'm concerned is to reduce um, the uncertainty and the amount of time pressure people feel on things like that and the amount of bunching that happens with review requests rather than to have a second place where we bunch everything up and everyone's like uh I need to get this merged by the 22nd because it's got due 22nd on it like you know the the point is to manage our work throughout the month.

15:27 **Speaker 0**
Yeah yeah yeah. No I totally agree with you on the on the purpose of the due 22nd but operationally we should have a clear expectation and a communication on what is the goal. So, my goal and originally thought was that our goal is to get issues merge MR specifically merge by the 22nd. So, I'm I'm fine if you disagree with that and and I would even propose that we change the name to not due 22nd if that's not what we're if that's not our goal right?

16:01 **Speaker 1**
Well you know maybe it's so different understandings of what this means but I would say my also I would also say that my goal is though my understanding of the goal is to have these things merged by the 22nd but if something's not merged by the 22nd I don't see that as a huge problem necessarily um, especially if people are traveling for the summit like um, it seems

16:20 **Speaker 0**
Okay. Well yeah no I'm saying summit summit aside so so let's not worry about what like this particular case but let's talk about the general case which is next month. Um, you you brought up a great point which is operationally I I first of all I didn't even think about like cross team things so that that messes it up but operationally we we said like within our own team um, you try to get things done on before due 22nd and um, if you have a choice to work on one thing versus another thing you work on the due 22nd one first. That's always a higher priority. And then so when it comes to reviewer I think that gets really complicated because then I think you're saying they they should work on something that's something else and not to due 22nd first a thing first.

17:12 **Speaker 1**
Uh, all I'm saying is that if you've done as much as you can on your due 22nd things and you're waiting for review you have you have other things to work on. And if the only reason something misses due 22nd is because it's waiting for review then it depends on how long it's been waiting for a review for if it's been waiting for a review for like a week and it's not a month where the summit's happening or something like that then you know we probably should have followed up with a reviewer sooner and seen you about maybe assigning someone else but if it's not reviewed by the 22nd because it was submitted on the 21st then maybe that was submitted too late. Um, you know and that's just information we have about um,

17:55 **Speaker 0**
Right. But I I I mean I I'm I'm just trying to actually I maybe disagree with me Sean I'm just trying actually to make it easier for the both developers and us to measure it. So, would you would it even be better just to say the goal is to get uh due 22nd issues in review by due 22nd in review by due 22nd. Is that like to me that's an easier thing to control. Um, we would have a greater sense of success for developers because they can actually control that more versus the cross team things. And then to me that's a better or step instead of saying getting it merged because there's uncertainty from cross team.

18:32 **Speaker 1**
Yeah but I don't I don't I just guess I guess fundamentally I don't feel the need for that much control like um,

18:40 **Speaker 0**
I I I I don't communication

18:42 Speaker 1
if we said it's in review roll out but we don't control how much work will come back from the review which is why I think the goal should be to have it merged by the 22nd. And you know if you

18:53 Speaker 0
Yeah I can see your point.

18:54 Speaker 1
if you have to spend another couple of days working on something after it comes back from the first round of review um, because there are a bunch of things you didn't think about then if you had it ready on the 22nd in review I would say that's that's too late. Like from from my perspective the idea is to get it merged by the 22nd but

19:05 Speaker 0
Yeah okay.

19:12 Speaker 1
I don't I don't know. If you want to measure it then I guess in review is easier to measure. I'm not a huge fan of measuring things like that cuz you get what you measure. So, that's sort of my bias there.

19:26 Speaker 0
Okay. I I mean it seems like we're not going to change it so that's fine. I'll just I'll I'll uh my last point I wanted to communicate is that I think it would be it it it's a better communication to state what the the intended goal is. Control is a bad word. So, it's it's the communication of the the goal of the expectation is to so we're saying okay so we're going to leave it and we're going to say that um, the goal is to get it merged by the 22nd. I'm contending that's a harder goal to achieve because you have you have less control of it and then that would suck for developers because they feel like um, they can't they can't affect that goal as much as as they can and so they would be less motivating but obviously you're the manager of these developers so therefore I would definitely defer to you.

20:20 Speaker 0
Um, but that's that 's my final word and I'll let you have the final word before we move on to the next topic.

20:26 Speaker 1
Um, yeah I mean maybe we just talk about this again when Andre's back.

20:32 Speaker 0
Yes deferring is the best way. Okay so not nothing's changed. Okay thank you. Um, so 11.4 issues uh how how long is this meeting? Do we have we have time right? Uh, so um, I I already updated a bunch of 11.4 issues. There's a lot still I think. Um, what what what are your thoughts on that Sean on the 11.4 issues for that?

21:03 Speaker 1
Uh, have a look to them. Let me take a look. Um, I'm not going to share my screen cuz I guess some of them might be confidential but

21:10 Speaker 0
And you animal you can take a look as well and I I I'll link to this as I should have earlier.

21:24 Speaker 1
Okay yeah so first of all there's loads there. Secondly I don't think any of them are confidential.

21:29 Speaker 0
Okay.

21:33 Speaker 1
Um,

21:37 Speaker 0
And then we can we can subtract out the portfolio management thing. I'm really annoyed that not annoyed anybody specifically but we I'm annoyed that we didn't get the inherent milestones thingy cuz what this happens constantly is every time we push back issues the like 11.5 11.6 there's just more and more stuff in those and that um, I really want the roadmap view so that we can see that when we're overloading stuff um, in the next couple of milestones.

22:12 **Speaker 1**
Yeah um, so one thing I see is that we have four back end technical debt issues which is cuz we've had to keep pushing them out but we can't keep pushing them out. Um, so uh sorry five. Um,

22:29 **Speaker 0**
So, it's it's it's a bad indicator but it's a good thing that we have so far fives.

22:35 **Speaker 1**
Yeah um,

22:40 **Speaker 2**
Is it accurate that there are only three UX issues and two of them are already assigned to Pedro?

22:48 **Speaker 0**
Uh, what the UX label you mean animal?

22:50 **Speaker 2**
Yeah.

22:52 **Speaker 0**
Um, how we've worked is a lot of these have been UX considered already. So, if you look at especially the portfolio management ones a lot of them are like um, outgrowth of existing issues. So, they're essentially UX ready but we didn't we we we're not we didn't put those labels there specifically. So, maybe that's something between you and Pedro you can figure out how you want to do but um, manage that. But I'm I'm fairly confident that these issues are not like they're not new things that UX needs to consider or or or needs a lot of work on. These are existing ideas. There's visuals and things like that. Was that the concern like there's there's not enough work for UX or that there's like like these are brand new things or

23:39 **Speaker 2**
Yeah I guess I was under the the impression that if it needs UX it is labeled UX and three.

23:45 **Speaker 0**
I see. Yeah a lot a lot of it is if you look just sort on portfolio management all those are there's not like portfolio management for 11.4 there's nothing new. Like uh like like a like 99% certain that Pedro has looked at all of them. I'm going to do that right now. Yeah yeah I'm pretty sure a lot of them he told me to open as well um, yeah so so for for portfolio management especially uh Sean as you're looking at it I I already told the team that

24:31 **Speaker 0**
uh I expect to push a lot of the 11.3 things into 11.4 because a lot of the 11.3 things will not be done. And then so we'll have to remove a lot of the 11.4 existing 11.4 things.

24:43 **Speaker 1**
Okay. We have um, a VSM thing in there about the time analysis line chart. Is that still valid for 11.4?

24:55 **Speaker 0**
Uh,

24:55 **Speaker 1**
I mean I guess it's waiting for Jan's thing about the system notes. So,

24:58 **Speaker 0**
Yeah I mean it's it's valid in in the sense that I want it. Um, it could be invalid it could be invalid.

25:03 **Speaker 1**
Okay right so it's it's still going there. Yeah that's fine.

25:06 **Speaker 0**
Yeah it could be okay. Could be invalid if you say like we can't do it but

25:26 **Speaker 1**
um, yeah I don't know if there's anything in specific we want to talk about there. So,

25:34 **Speaker 0**
Yeah if there's nothing that seems horrible then I'm fine or if there's something that you really wanted to do that and that that it's not there then we can talk about it but other other than that we can just I I'll definitely just wait for you and Andre to to further parse this as as time progresses.

25:56 **Speaker 1**
Um,

26:00 **Speaker 0**
for me there's nothing like new. It's just we're we're continuing to just chug along and do stuff. Um, new as in there's no big new initiatives I see in 11.4. Um, it's stuff that especially for portfolio management we need to we need to be able to close issues. So, that that's a big problem. Uh, close epic sorry. Um, and so that's not I mean it's I guess it's exciting for people who need to close epics but it's not very flashy and then the the other things would be the the VSM thing would be a pretty major feature. But beyond that it's not nothing new that we haven't talked about already. So, maybe that's I'm selling it but um,

26:43 **Speaker 1**
Okay. Yeah so from my perspective apart from sort of general stuff it looks like we've got a lot of elastic search stuff and a lot of technical debt. Some of them are both um, that we need to address.

26:57 **Speaker 0**
Okay.

26:57 **Speaker 1**
Um, in 11.4. So, as long as we have time for that then that's fine.

27:04 **Speaker 0**
Okay. I think a lot of the elastic search ones I think you added in for sure the technical debt things I think you added in and I and I purposely left it in I didn't move it out further. Um, so so I'll let you drive that. Um, and then go ahead and Sean look at future tech debt and like if it's getting like really ridiculous um, that mountain um, and if you want like a separate strategy to address it beyond just every month we just sort of chip away at the mountain um, like if you want to put it in epic or be more strategic on like you know managing it go ahead and and and do that work and then let me know. But from my perspective

27:54 **Speaker 0**
seems like you're putting it in every month and then picking a few and then if that's good enough then that's great. If it's not then let me know.

28:02 **Speaker 1**
Okay.

28:08 **Speaker 0**
Uh, yeah that's that's all I had. I didn't want to add stuff on agenda. Um, and then so are we meeting next week?

28:21 **Speaker 1**
Yeah I can I can put more exciting things on the agenda next week um, like talk about more feature-ish things. Maybe that'll be a very useful time. Um, Annabelle you'll you'll be here right?

28:32 **Speaker 2**
Yep.

28:32 **Speaker 0**
Okay. So, yeah so we'll we'll meet next week then.

28:37 **Speaker 1**
Cool thanks Victor. Thanks Annabelle.

28:39 **Speaker 0**
Thank you.

28:39 **Speaker 2**
Thanks Victor.

28:40 **Speaker 0**
Talk to you first there. Bye.
